CapStorm | snowflake®

FROM SALESFORCE® TO SNOWFLAKE

Incremental High Frequency Data Warehouse

According to the World Economic Forum, "The Fourth Industrial Revolution represents a fundamental change in the way we live, work and relate to one another." Customers are demanding personalized insights in every business interaction. Only by capturing data, deep analysis, and predictive analytics can you even attempt to meet your customer's expectations. Data scraps that would have been tossed out three years ago and now important to capture along each step of the customer journey.

YOUR CUSTOMERS EXPECT MORE

Integrate Salesforce data into Snowflake and create a true data warehouse across all of your systems. CapStorm enables near real-time replication of Salesforce data and schema into Snowflake. The fully incremental Salesforce data extract ensures that your data warehouse is always in step with the current state of your CRM.

# Deliver with predictive analytics and right-time data insights

CapStorm
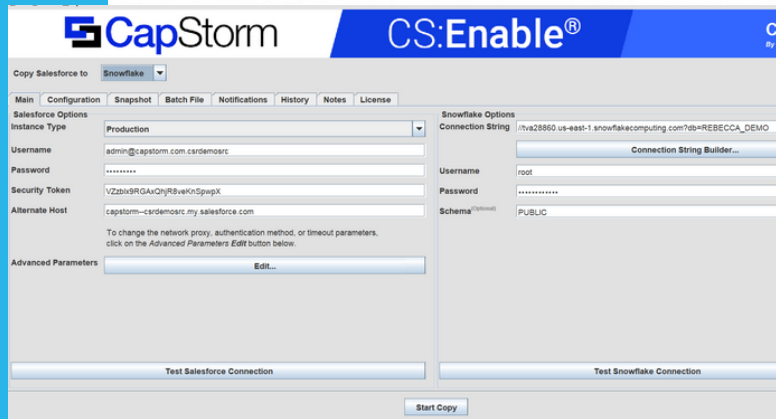

How It Works

1 Install

Install software on AWS, Azure, GCP, or On-Premises.

2 Connect

Connect to Salesforce and Snowflake then click start to replicate Salesforce data and structure.

3 Leverage

Use Snowflake to increase business revenue through near real-time predictive analytics and right-time data insights.
